GPS INTELLIGENT CONTROL

GPS

Intelligent controlled machines offer significant cost savings as well as improving site management with reduced working hours & increased quality of work.

Increases efficiency & improves health and safety plus reduces resource and material waste with no waiting for stakes to be set.

Allows high precision and more complex work with remote real-time construction.

We have GPS Intelligent Control Dozers & Excavators

Komatsu

D51PXi • D61PXi • D65PXi

- Intelligent dozers can perform rough dozing to high-precision finish grading in automatic mode to give outstanding productivity
- It senses & controls the blade load to optimise the start of the cut and minimise track slip.
- Equipped dozers can greatly enhance work efficiency in any application, especially when a specific finished level must be guaranteed.

Komatsu 3D GPS Excavators

- Intelligent Machine Control excavator (GPS)
- Auto Grade Assist – High accuracy, no re-work
- Safer Operation – No manual surface checking
- Auto Stop Control – will not allow any over dig
- Fuel saving – Low fuel consumption plus less work required as the work you do is 100% right first time
- Safety – no more site surveyors working in close proximity to heavy plant equipment.
